Chris Moen

Principal Software Architect at pipeMOTION

Canada

Experience

pipeMOTION

Principal Software Architect

August 2026 - Present (4 months)

At pipeMOTION, we’re transforming how real estate and mortgage brokers manage client relationships and move deals forward. As Co-Founder and CTO, I lead the development of our full-stack platform and AI-powered systems, automating workflows, streamlining client communication, and helping professionals identify and act on sales opportunities more effectively.

Bell

7 years 4 months

Senior Data Scientist

July 2025 - August 2026 (1 year 2 months)

Developed and deployed SQL-based anomaly-detection and analytics pipelines to help identify production issues across large-scale systems. Built automation and diagnostic tooling using Python, Linux, Bash, and Ansible to support root-cause analysis, API health monitoring, and service recovery in live environments. Collaborated closely with DevOps and backend teams to maintain reliable data and API infrastructure serving millions of users.

Software Engineer - Access Networking

March 2022 - July 2025 (3 years 5 months)

• Coordinating the design, development, testing, and deployment of complex networking solutions supporting 1.5 million users across 3 different Bell modem brands.

• Translating requirements into actual deliverables to architect functional, reliable, scalable, and secure solutions.

• Diagnosing intricate issues within Bell's access network and developing fixes to improve achieve 99% service reliability.

• Directing and supporting multiple projects concurrently in complex multi-vendor environments, from new solution design and deployment to redesigns, upgrades, and transitions, consistently meeting 100% of project goals

• Directing regular network and system audits, identifying gaps and deficiencies in access networks, and developing remediation plans to improve reliability, enhance security, and augment service delivery.
• Delivering high-impact initiative to catapult IPTV performance for a major modern launch, resolving critical software defects, improving KPIs and service availability, and slashing $735K+ in daily maintenance costs.
• Identifying and addressing major issues with Bell's "Giga Hub", propelling QoS by 10% and skyrocketing user satisfaction

DevOps Engineer- TV SRE
May 2019 - June 2022 (3 years 2 months)
Ottawa, Ontario, Canada

• Supported the DevOps strategy, ensuring rapid production and deployment while driving resilience and availability.
• Coordinated hundreds of deployments concurrently to 1.5M+ users, ranging from including Crave TV to Amazon Prime integrations, set-top box receiver updates, remote firmware upgrades, and CDN optimizations, meeting deliverables
• Directed the design, implementation, and maintenance of continuous integration and deployment (CI/CD) pipelines, slashing deployment times by 20%.
• Spearheaded tailored monitoring system via Kibana/PowerShell to enable real-time services and infrastructure assessment, ensure uninterrupted system reliability, and maintain 99% availability.
• Provided ongoing training to development teams on DevOps practices, containerization, and virtualization to expand technical competence, boosting overall productivity.

Wizeprep
Software Engineer
June 2019 - June 2020 (1 year 1 month)
Greater Vancouver Metropolitan Area

• Directed the end-to-end design, development, and deployment of 3 different advanced applications, systems, and solutions in a fast-paced Agile environment.
• Conducted unit and integration testing across components, uncovering pain points and defects, implementing corrective measures, augmenting product quality, and growing user satisfaction.
• Created integration for Google Data Studio and HubSpot dashboards, overhauling data analysis and reporting capabilities, enabling informed decision-making, and reducing cycle times.

• Designed and introduced several script add-ons via Java Script, integrating with Google Tag Manager and HubSpot and enhancing user engagement.

Bell

Solutions Architect Co-op

September 2017 - August 2018 (1 year)

Video Innovation Centre

• Supported 2 projects concurrently, performing QA and testing, troubleshooting and debugging technical issues, and re-designing products to increase performance and maximize functionality.

• Participated in Agile development practices (sprint planning, grooming, and retrospectives), collaborating closely with cross functional team members and meeting 100% of deliverables.

• Introduced automation scripts using Python and PowerShell, delivering an increase in deployment speed.

Education

University of Toronto

Bachelor's Degree, Electrical Engineering, Systems and Control · (2014 - 2019)
